Topics Discussed: We discussed about the Full Use Case Diagram and how would we build it based on the explanations we took in class. We also discussed the Activity Diagrams and how would we build them to be efficient for the system flow and processes.

Decisions Made: We decided to go back and fix the relationships between the use cases so they make more sense and better reflect how the system actually works. We also worked on making the activity diagrams clearer and easier to follow by removing anything repetitive or unnecessary.
